COMPLAINT

Relevant signs and symptoms
Medical history
Surgical history
Relevant family history
Allergies

PATIENT-CENTRED
PLAN

Personal impact of the 2 issues
Family & friends
Employment
\$\$\$
EtOH / drug use / addictions

2nd issue

Start with an **open-ended question** to elicit the presenting complaint (the 1st issue). From here, try to get as much **context (both medical and social)** as possible - learn about your patient's life and current issues. The 2nd issue will likely present itself, and once you have the entire context you can come up with a **patient-centred plan**.
